REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art does not teach a coupler system for coupling a projection lens to a projection optical signal generating device comprising, in combination with the additionally recited features, an integral sealing means for sealing said projection signal generating device to said frame in a fluid tight manner wherein said sealing means comprises at least two sealing glands formed on a first side of said sealing means that each will form a complete independent seal between said frame and said projection signal generating device for redundantly sealing said frame. While Toide (U.S. Patent No. 5,537,167) may be considered to disclose a multiple gland seal (121 in figures 46-47 and 122 in figure 48(a)) the seal is not formed on a first side of said sealing means that each will form a complete independent seal between said frame and said projection signal generating device. At best it is between the lens and the frame while a packing or o-ring 110 is used between the projection signal generating device and the frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
